For Immediate Release:

Applied Logic Releases new AES Data Encryption Product

Pro/Encrypt will protect sensitive iSeries or System i data for secure backup and storage, file transfer, or physical transport.

Applied Logic Corporation, the developer of AS/400 and iSeries Productivity software, announces the release of **Pro/Encrypt™** -- a powerful and easy to use software tool for encrypting data on midrange systems without relying on any specialized hardware. iSeries or System i data can be easily encrypted and decrypted using Advanced Encryption Standard (AES) 128, 192, or 256 bit encryption. Strong encryption provided by Pro/Encrypt meets or exceeds regulatory privacy standards.

Encryption and Decryption Made Easy

- Selected data is encrypted with the desired strength and saved to the specified location
- Automated encryption of individual files, groups of files, or entire libraries
- Easy decryption of the encrypted files using a symmetric key or pass phrase
- Intuitive and easy to use interface
- Encrypt save files before backing up to tape
- Requires no special hardware
- Function can be run interactive or from batch
- Encryption or decryption command can run from within customer jobs
- Encrypted files are the same size as before encryption
- AES128, AES192 or AES256 encryption is available
- Key size options of 16, 24, or 32 characters
- Use to help comply with government privacy laws, Sarbanes-Oxley compliance, HIPAA, PCI-CISP, and other regulations and requirements
- Limit legal liability

Top Level Security Protection

- Uses encryption methodology adopted by the National Institute of Standards and Technology (NIST) and adopted as the federal standard (FIPS-197)
- Meets requirements to protect classified information up to the SECRET level and suitable for protecting national security related information (CNSSP-15)
- Satisfies the recommendations of the Payment Card Industry (PCI) standard and the Visa Cardholder Information Security Program (CISP)
- Satisfies the "strong encryption" requirements of the California Privacy Notification Act (SB1386) and other notification laws
- Meets the data protection requirements of HIPAA in the medical industry

Details are available at <http://www.alcsoftware.com/pro-encrypt>. **Pro/Encrypt™** is available for a one-time license fee that starts at \$895.
